We think you can make a better card of the group view, as at present nothing shows to any advantage.

We would suggest you take the center of the view, which may mean leaving off one building on the left, which is unnecessary, and cutting out the group of small trees at the bottom of the picture.

By changing the heavy group of trees at right bottom, making to appear as grass, and adding a few more of the small trees, we think it will make a better card, and enable the buildings to be larger, and improve the general appearance of the card.
